

# SOPPARI RAMESH

Frontend Developer

@ sopparir940@gmail.com    <https://www.linkedin.com/in/soppari-ramesh/>     Hyderabad, India

## SUMMARY

I am a proficient Frontend Developer specializing in React.js and JavaScript, focused on creating dynamic user interfaces that enhance user engagement. My strong technical skills encompass state management, backend integration, and real-time data handling. I thrive on impactful projects that allow me to combine creativity with technical expertise to generate meaningful results

## EXPERIENCE

### Reactjs Developer

[Next Page Technologies](#)     02/2024 - Present     Hyderabad, India

A technology company focused on developing innovative web applications

- Developed an excellent, user-friendly, and scalable food safety reporting platform using Next.js and React.js, enhancing user experience and ensuring efficient real-time reporting functionality
- Implemented server-side rendering (SSR) for excellent SEO optimization, improved page speed, and enhanced content discoverability for search engines and users
- Built a robust backend API with Node.js and Express.js to efficiently handle real-time reports, ensuring scalability, data security, and seamless user interactions
- Integrated location-based reporting using Google Maps API
- Integrated MongoDB for efficient data storage and retrieval, ensuring seamless management of user reports and location-based data

## EDUCATION

### BSC (Computer Science)

[WCCM Degree College](#)

 01/2020 - 12/2020     Wanaparthy, Telangana

### Intermediate (MPC)

[SRI Thriveni Junior College](#)

 01/2016 - 12/2016     Wanaparthy

### School

[TSR School](#)

 01/2014 - 12/2014     Keesara Gutta, Telangana

## KEY ACHIEVEMENTS

-  **High-performance React Application**  
Spearheaded the development of a high-performance, scalable React application, improving user engagement by 40%
-  **Legacy Systems Migration**  
Led the successful migration of legacy systems to React.js, modernizing the user interface
-  **Modular Component Development**  
Collaborated with cross-functional teams to create reusable, modular React components, streamlining development and reducing redundancy

## LANGUAGES

Redux	Responsive design	MongoDB	
mysql	SEO	Expressjs	Tailwind
WebSockets	Node.js	Express.js	
git			

## SafeFood Project

📅 04/2024 - 07/2024

SafeFood Project aimed at enhancing food safety reporting

- Developed a comprehensive food safety reporting platform using Next.js and React.js, enabling users to easily report unsafe food products and access real-time data
- Implemented server-side rendering (SSR) with Next.js, optimizing SEO performance and ensuring fast content delivery for better user engagement
- Built a scalable backend API using Node.js and Express.js, handling real-time user submissions and managing large volumes of safety reports efficiently
- Integrated MongoDB for flexible and scalable data storage, allowing seamless management of user reports and safety ratings
- Implemented real-time notifications and updates using WebSockets, ensuring users are notified promptly

## Biksouq Project

📅 07/2024 - 10/2024

Biksouq – E-Commerce Platform

- Developed a **full-featured e-commerce web application** supporting product browsing, search, cart, and checkout.
- Implemented **secure payment integration, order management, and user authentication** for a seamless shopping experience.
- Built an **admin dashboard** for managing products, categories, and payments.
- Utilized **React.js, Node.js, Express.js, and MySQL** for a scalable and responsive architecture.
- Applied **Tailwind CSS and Context API** for state management and modern UI design.

## R4Paws – Pet Care & Adoption Platform

📅 03/2025 - Present

Short summary of your work

- Designed and developed a **web platform for pet adoption, care services, and product purchases.**
- Built features such as **pet listing, search & filter, booking services, and online donations.**
- Integrated **secure user authentication, role-based access, and payment gateway.**
- Implemented an **admin dashboard** for managing pets, services, and adoption requests.
- Tech stack: **React.js, Node.js, Express.js, MongoDB, and Tailwind CSS** for responsive UI and scalable backend.
